

Oracle Tutor Quick Start from USIT

U.S. Information

Technologies Corporation (USIT) is a leading provider of Oracle-based information technology solutions. Our national workforce, of mostly former Oracle professionals, brings extensive experience to projects needing Oracle database, development tools, e-Business suite, Tutor, and Tutor expertise.

KNOWLEDGE TRANSFER

- Oracle Tutor
- Oracle UPK

USIT offers Knowledge Transfer services, including Business Process Mapping using Oracle Business Models, Business Process Re-Engineering, and Change Management services. USIT consultants are expert at implementing Oracle applications knowledge transfer tools, such as Oracle Tutor, Oracle Business Models, and Oracle User Productivity Kit, to increase the efficiency and success of your implementation team.

USIT offers unique Six-Week Oracle Tutor Quick Start packages from \$35,000 which include:

- Three-weeks onsite training and working hands-on
- Three-weeks offsite developing Tutor content.

USIT will develop custom Tutor deliverables at the client site, which will employ all of Tutor's capabilities, using the client's real data. USIT will train client users and create the initial Tutor documents in this unique six-week offering. At the end of six-weeks, the client will have its initial Tutor deliverables completed and will possess the competence to continue the project on their own. USIT can continue on as PMO for the full project lifecycle.

USIT technicians will install the Oracle Tutor software and download predefined content appropriate for the project. USIT can host the deliverables on its own servers for the period of the project at no additional cost.

- USIT has extensive experience building Tutor Content and managing teams to rapidly create, modify, and maintain an organization's process documentation (business flows, policies, procedures, and support documents) in Oracle Tutor.
- USIT will scope the project and work with client employees to build Tutor deliverables using their own data.
- USIT utilizes Oracle Tutor to create business processes, and maintain a repository of supporting documentation.

USIT will train select client employees on

- Oracle Tutor. USIT will concentrate training activities using the client's data, so that deliverables from the training contribute to the end product.

At the end of six-weeks, the client will have

- its initial Tutor deliverables completed and will possess the competence to continue the project on their own. USIT can follow up as PMO for the full project lifecycle.
