

U.S. Information Technologies Corporation (USIT) is a leading provider of Oracle-based information technology solutions. Our national workforce, many of whom are former Oracle professionals, brings experience and skills to projects needing "Best In Class" Oracle applications and technology expertise.

KNOWLEDGE TRANSFER

- Oracle UPK
- Oracle Tutor

USIT offers Knowledge Transfer services, including Business Process Mapping using Oracle Business Models, Business Process Re-Engineering, and Change Management services. Our consultants are skilled at implementing Oracle knowledge transfer tools, such as Oracle Tutor, Oracle Business Models, and Oracle User Productivity Kit (UPK) to increase the efficiency and success of your organization.

Oracle UPK QuickStart from USIT

6-Week UPK QuickStart packages include:

- Three weeks onsite training and hands-on
- Three weeks offsite creating UPK content

USIT will develop custom UPK deliverables -- leveraging the latest features of UPK -- using **your** data at **your** site. USIT will train key users and create the initial UPK learning modules targeted for completion during this unique six-week offering. Upon completion of the 6-week QuickStart, you will have custom UPK output, completed and available for use by your organization, and key individuals possessing the competence to continue the project on their own. USIT can continue on as PMO, or provide staff augmentation for your projects throughout their lifecycle.

A USIT Quickstart Delivers:

- Extensive experience building UPK content and managing teams to rapidly create, modify, and maintain an organization's process documentation (business flows, policies, procedures, and support documents)
- Project plan customized to **your** requirements: We will work with your employees to build UPK Learning modules using their own data.
- Custom simulations of **your** identified processes, with all supporting documentation stored and maintained in a central repository.
- Customized, hands-on UPK training for select employees and team members.
- USIT can even host the application on our own servers for the duration of the QuickStart project *at no additional cost!*
